There Is No Largest Prime Number

Euclid of Alexandria euclid@alexandria.edu 27th International Symposium of Prime Numbers

There Is No Largest Prime Number The proof uses *reductio ad absurdum*.

Theorem

There is no largest prime number.

1. Suppose *p* were the largest prime number.

4. But q + 1 is greater than 1, thus divisible by some prime number not in the first p numbers.

There Is No Largest Prime Number The proof uses *reductio ad absurdum*.

Theorem

There is no largest prime number.

- 1. Suppose *p* were the largest prime number.
- 2. Let q be the product of the first p numbers.
- 4. But q + 1 is greater than 1, thus divisible by some prime number not in the first p numbers.

There Is No Largest Prime Number The proof uses *reductio ad absurdum*.

Theorem

There is no largest prime number.

- 1. Suppose *p* were the largest prime number.
- 2. Let q be the product of the first p numbers.
- 3. Then q + 1 is not divisible by any of them.
- 4. But q + 1 is greater than 1, thus divisible by some prime number not in the first p numbers.
